Overview

What is LM311 voltage?

LM311 is a dedicatedly designed high speed differential comparator responsible for comparing voltages. The operating supply voltage can range from -15 to +15V for OP-AMPS. This voltage is 5V if LM311 is to be used for logical operations. The compatibility of LM311 output with TTL and MOS circuits is quite good.

What is LM311 IC?

One of the simplest application LM311 IC is a zero crossing detector circuit which is shown as: As you know, like other comparators, if the voltage at the non-inverting input is greater than inverting terminal, the output comparator will be high. Otherwise, output will logic low.

What is a LM111 N voltage comparator?

Over Temperature The LM111-N, LM211-N and LM311-N are voltage comparators that have input currents nearly a thousand times lower than devices like the LM106 or LM710. They are also designed to operate over a wider range of supply voltages: from standard $\pm 15V$ op amp supplies down to the single 5V supply used for IC logic.

Is LM311 a grounded power supply?

The output is obtained at COL OUT i.e. pin no. 7 while pin no. 1 is grounded. In order to minimize noise a bypass capacitor is supposed to be attached between supply and ground. This capacitor is not be incorporated at pin no. 4 if LM311 is being operated with single power supply. It is normally grounded in this case.

What is differential comparator LM311 IC?

In this section, we will see some examples and use of this differential comparator. One of the simplest application LM311 IC is a zero crossing

detector circuit which is shown as: As you know, like other comparators, if the voltage at the non-inverting input is greater than inverting terminal, the output comparator will be high.

What are the different packages of lm311?

The available packages of LM311 are 8-pin SO, 8-pin SOIC, 8-pin PDIP, and 8-pin TSSOP. The input current of LM311 is around one thousand times smaller than its standard counterparts. The operating temperature range is from 0 to 70°C. LM311 is available as 8-pin SO, 8-pin SOIC, 8-pin PDIP, and 8-pin TSSOP packages.
