Fully certified. Adding solar to a flat roof has built-in complexity and requires a wide array of options to meet the building requirements—such as a mechanically attached system, a ballasted system, or even a hybrid system.

Build strong and efficient solar arrays on flat roofs. IronRidge® Tilt Mount supports a wide range of solar panel tilting angles, while also resisting the extreme wind and snow forces experienced over a building's lifetime. The Tilt Mount System is listed to UL 2703, and compatible with most roof anchor products.

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.

Solar Stack is an innovative and damage-free solar panel mounting system that revolutionizes the way solar panels are installed on roofs. Unlike traditional methods that involve drilling holes and potentially causing damage to the roof, Solar Stack utilizes a spray polyurethane foam adhesive to securely bond the mounts to the roof surface.
