What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:.

Will USTR impose tariffs on imported solar cells & modules?

On January 23, 2018, USTR announced that the President had approved recommendations to provide relief to U.S. manufacturers and impose safeguard tariffs on imported solar cells and modules, based on the investigations, findings, and recommendations of the independent, bipartisan U.S. International Trade Commission (ITC).

How will tariffs affect solar cells in 2024?

In 2024, tariffs for electric vehicle battery cells will increase to 25%, with energy storage tariffs following suit in 2026. The direct import of solar cells from China was less than 1% in 2021, underscoring the limited direct impact on solar cells these tariffs may have in the U.S. market.

How will tariffs affect the US solar industry?

Consequently, while the tariff increases appear substantial, their actual effect on the overall US solar industry is likely muted, as importers have already diversified their supply chains away from Chinese manufacturers. If one were to import solar cells from China today, they would cost a few cents to a nickel per watt.

Will China's solar tariffs affect the US market?

The direct import of solar cells from China was less than 1% in 2021, underscoring the limited direct impact on solar cells these tariffs may have in the U.S. market. Instead, the majority of solar cells used in the US are sourced from regions like Southeast Asia, which offers similar pricing without the tariffs imposed on Chinese products.

Are bifacial solar modules covered by the Section 201 tariff?

Initially, the Section 201 tariff excluded bifacial solar modules, as no significant U.S. production existed. However, as the U.S. module manufacturing base began to scale, the Biden administration recently reinstated a 15% tariff on bifacial modules. 2022a
