Overview

Can solar panels be installed on a rooftop?

When installed on rooftops (or custom ground-mounts), standard solar panels have long lifespans, high efficiency, and relatively low upfront costs. While the U.S. has only managed to install one solar roadway so far, there are already over three million solar panel installations nationwide.

How does a roof affect solar installation costs?

The type of roof installed when a building is built can significantly impact installation costs for solar. Solar PV panels typically come with a 25-year warranty. Installing a roof that will last at least as long is crucial to minimize the need for a roof replacement during the solar system's lifespan.

Should you install solar panels on a tracking system?

But, the benefit of installing them is that solar panels mounted on a tracking system will produce more electricity than if they were stationary. Your solar panel setup will also have an inverter (or multiple) connected through wiring to the panels.

How are solar panels affixed to my property?

Your solar array will be affixed to your property using racking and mounting systems. Rooftop solar panel systems will have a fixed mount system, keeping the panels stationary on your roof. All rooftop mounting systems serve the same functional purpose but can differ in how they're installed.

How do you install solar panels on a roof?

Start with the racking system, which you'll fix to your roof to hold your panels in place. Measure the space you have on your roof, and then arrange a solar panel design on the ground that fits within the allotted space. You can use chalk lines to create a guide for yourself on your roof.

How do I choose a roof-mounted solar system?

When choosing a roof-mounted solar system, consider the albedo rating of the roof. A highly reflective roof will reflect more radiation onto the solar collectors, increasing their efficiency. Additionally, the roof will stay cooler due to less solar radiation being absorbed, which can prolong the life of the system.
