Photovoltaic panel installation to save electricity

Overview

Any solar installer should be able to help you with these three steps: Step 1. Subtract any upfront incentives from the total cost of your solar panel system. Step 2. To calculate the amount you save on electricity, multiply the average monthly cost on your utility bills by 12 to get your annual savings. Step 3. Divide your answer from Step 1 by your answer from Step 2 for your solar payback time in years.
