Photovoltaic panel leasing contract pitfalls

Overview

Predictable payments per contract. Price escalators could increase the monthly payments. Access to clean solar energy. Electric savings aren't as large as they would be if you owned the panels.

Predictable payments per contract. Price escalators could increase the monthly payments. Access to clean solar energy. Electric savings aren't as large as they would be if you owned the panels.

The biggest disadvantages of solar leases is that homeowners don't get the federal tax credit, long-term savings are lower than purchased solar panels, and it can be difficult to sell a home with I. What is a solar panel lease?

Much like renting a car or a home, a solar panel lease is a financial agreement with a solar energy company where you choose to pay a fixed monthly amount to receive the energy that comes from the solar panels on your property. You don't own the solar panels, but you also aren't required to pay for installation, maintenance, or repairs.

Should you buy or lease a solar panel?

Choosing the right solar panel financing option will make going solar more affordable and extend your long-term benefits. A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value.

What are the pros and cons of solar leasing?

As with any solar financing option, solar leasing comes with its share of pros and cons: The three main advantages of a solar lease are: Saving money on electricity: With a solar lease, you'll save on electricity costs throughout your agreement.

What happens if a solar lease payment is less than electricity?

So if your lease payment is less than what you were paying for electricity from the grid, you could save money every month. No worries about repairs or maintenance: The solar lease company is responsible for repairing the panels and performing solar maintenance on the panels.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

.

Is a solar lease right for You?
