Overview

The individual elements of the GEDA Solarlift, made of light aluminum, can be dismantled quickly and transported with the help of a chassis in a space-saving and effortless manner. The basic unit of a GEDA solar lift consists of a standard carriage with cable breakage protection, a head section with quick-locking.

The GEDA Solarlift has particularly been designed for working with sensitive materials and offers a specific solar platform for a safe transport of expensive solar panels. The platform provides a specially developed plastic.

Altogether, the GEDA Solarlift offers a broad range of advantages. The lift's acquisition costs are worth the money and the lift itself is quite space.
