Photovoltaic panel mounting bracket distance

Overview

The gap between solar panel rows should be around five to six inches, but it is also recommended that you leave one to three feet of space between every second or third row.

The gap between solar panel rows should be around five to six inches, but it is also recommended that you leave one to three feet of space between every second or third row.

As most installers recommend leaving a small space between panels, we will round up the length of the panels to 66 inches.

Photovoltaic panel mounting bracket distance

Quality Solar Panel Mounting System, Solar Panel Mounting Brackets
