Photovoltaic panel purlin installation tips

Overview

How to install a solar photovoltaic system?

The installer should conform to all the safety precautions listed in this guide when installing the module. Local codes should also be followed in such installations. Before installing a solar photovoltaic system, the installer should become familiar with the mechanical and electrical requirement for such a system.

What is solar panel support with Z profiles and purlins brackets?

Solar power systems use the sun's rays as a high-temperature energy sources to produce electricity in a thermodynamic cycle. Thereby we have to introduce some solar panel support with Z profiles and purlins brackets, which are hot galvanized steel material for use in long time with better surface and the best cost during the system construction.

Can a solar panel be installed on a roof?

No consideration has been taken on the effect that the solar panel will have over the roof structure. It has been assumed that the roof will be able to resist the additional loadings imposed by the installation of the solar panels in conjunction with the Clenergy Mounting System. Note 14.

How to install rails & PV modules?

Screw out the top nut of hanger bolt, connect and adjust tin foot position and tighten the top nut with the recommended torque of 16~20 N·m. Follow sections "Rail Installation (Page 13)" and "PV Module Installation (Page 15)" to install the Rails and PV Modules. 2. Hanger Bolt for metal purlin Installation.

Can a roof withstand a load imposed by solar panels?

It has been assumed that the roof will be able to resist the additional loadings imposed by the installation of the solar panels in conjunction with the Clenergy Mounting System. Note 14. All components from Clenergy must be

installed according to manufacturer's specification and the instructions shown in the relevant installation manual.

How do I install the ER-I-05 on a metal purlin?

Fix the ER-I-05 at the planned locations on metal or wood purlins as shown in the figure on the right following the Buildex screws installation guide below: Use a 3/8" Hex Socket. Use a mains powered or cordless screw driver with a drive speed of 3,000 RPM maximum. Fit the driver bit into the screw and place at the fastening position.
