While installing solar panels on tile roofs is certainly possible, it requires the right technique and knowledge. See how SunPower can protect your roof's integrity while providing the world's best solar.

What are thermal solar tiles & hybrid solar tiles?

Thermal solar tiles are created primarily to catch and use solar heat instead of

PV panels, which concentrate on generating electrical energy. Hybrid solar tiles are roofing shingles that produce solar energy and mix solar and non-solar tiles to produce a roof that both produces energy and protects against the weather.

How do photovoltaic cells in solar tiles work?

Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy. To imitate the size and shape of conventional roofing tiles or roof shingles, the cells are usually silicon, the same material used in traditional solar panels.
