

Photovoltaic panel short-circuit current measurement

Overview

The short circuit current, I_{SC} , is the short circuit current density, J_{SC} , times the cell area: $I_{SC} = J_{SC} A$.

The short circuit current, I_{SC} , is the short circuit current density, J_{SC} , times the cell area: $I_{SC} = J_{SC} A$.

Measuring the module or array output under short circuit conditions will allow measurement of the short-circuit current (I_{sc}), which will be used in PV system sizing and in many Code calculations.

Locate the short circuit current (I_{sc}) on the specs label on the back of the panel. Remember this number for later. My panel's I_{sc} is 6.56A. 2. Prep your multimeter to measure DC amps.
