# Photovoltaic panel surveillance camera installation

Warranty  
**10 years**

LiFePO<sub>4</sub>

Intelligent BMS

Wide Temp:  
-20°C to 55°C

## Overview

---

Your Battery is the heart of your solar powered IP Camera system and provides consistent power day and night despite weather conditions. The Solar Panels provide power to keep the Battery charged on a all the time on daily basis. The most common type of battery you will use for your Solar Powered IP Camera is a Deep.

Camera spec sheets also tell you whether the equipment runs on 12 Volt DC, 24 Volt DC, or Power over Ethernet (PoE). These are all things you'll need to know to successfully power a camera via solar. Read through the camera.

To adequately charge your Battery Array you would use a Solar Panel with equal or greater Voltage output. If you have created a 24V Battery Array by.

Finally, you will want to find a weather proof enclosure to house your equipment such as Solar Charge Controller and batteries. This is a safe spot that can withstand the outside.

If your Battery is the heart of your solar IP Camera system, the Solar Charge Controller is the brains, and ensures that your Battery is not over-charged or over dis-charged. To select the.
