# Photovoltaic panel tax rate

## Overview

---

Do solar panels qualify for tax credit?

After installing solar panels, you can claim the tax credit on the IRS filing that corresponds to the year you installed your system. For example, a solar installation completed in June 2024 would generate a federal tax credit that the owner could claim in April 2025. Who Qualifies for the Federal Solar Tax Credit?

.

Are solar PV systems eligible for a tax credit?

Solar PV systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the ITC, raising it to 30% for the installation of which was between 2022-2032. (Systems installed on or before December 31, 2019 were also eligible for a 30% tax credit.)

Are solar panels tax deductible?

Under most circumstances, subsidies provided by your utility to you to install a solar PV system are excluded from income taxes through an exemption in federal law. When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit.

Do solar rebates increase taxable income?

The credit amount varies by state and, if refundable, might raise your taxable income. Rebates provided to you by your utility company in exchange for installing a solar PV system will reduce your solar system costs, lowering the amount you can claim under the federal solar tax credit.

Can I get a solar tax credit in 2024?

In 2024, residential customers will no longer be eligible for the Solar ITC, although commercial customers can still receive 10% back in tax credits.

Saving with the solar tax credit The Solar ITC can help to significantly reduce the total cost of a home solar system. The average cost of a solar panel system ranges between \$15,000 and \$25,000.
