Jinergy solar panels, due to the efficiency of their HJT technology, can be used in a photovoltaic farm. In installations with a capacity of over 30kWp, the profitability of the investment is crucial. Jinergy modules, when used with a SolarEdge or Kehua inverter, can pay for themselves within up to 6 years.

What is the efficiency of jinergy photovoltaic panels?

The efficiency of Jinery's photovoltaic panels is very high, thanks to the choice of HJT (heterojunction) technology, which combines the best qualities of crystalline silicon with amorphous thin-film silicon. In 2019, the efficiency of HJT photovoltaic cells from this manufacturer reached 24.73%.

What is the key to the development of the photovoltaic industry?

With solar cells booming in the global market, Yang Liyou, general manager of Jinery, pointed out that the key to the development of the photovoltaic industry is innovation.

What is Jinery's warranty on solar panels?

Jinery offers a 30-year warranty against linear power loss for its solar panels. This means that if nothing happens to the solar panel after 30 years, its power should still be at a high level of 85.9%.

Why is HJT a good solution for photovoltaics in farms?

The HJT panel is a good solution for photovoltaics in farms due to its bifacial technology, which produces up to 35% more energy than traditional panels. It also generates energy from below using ALBEDO. The Jinery silicon cell bifacial coefficient is one of the highest in the industry and amounts to as much as 85%.

What is the Jinery bifacial coefficient?

The bifacial coefficient of Jinery's silicon cells is one of the highest in the industry, amounting to as much as 85%. The latest Jinery product series with high-performance HJT modules are enclosed in frames.
