Overview

Delve into utility-scale solar Power Purchase Agreements (PPAs) in this chapter from 'The Law of Solar.' Learn about revenue streams, contract structures, risk management, and key considerations for successful solar project agreements.

Delve into utility-scale solar Power Purchase Agreements (PPAs) in this chapter from 'The Law of Solar.' Learn about revenue streams, contract structures, risk management, and key considerations for successful solar project agreements.

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

Financial: Even at \$3/kW installed cost, simple payback is 18 years. (initial electricity cost of \$0.10/kWh and 3%/year electricity cost inflation) Politics: How to justify expense with such a long payback. If RECS begin to have some real value, this would be a positive for ownership. 2.

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.
