How much does one solar panel cost?

The average cost for one 400W solar panel is between \$250 and \$360 when it's installed as part of a rooftop solar array. This boils down to \$0.625 to \$0.72 per watt for panels purchased through a full-service solar company.

Multiple factors go into solar panel prices, including which solar company you choose, the number of panels, the federal tax credit, the type of panels and more. Let's dive into what can impact .

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps .

In 2024, the average solar panel cost is \$31,558 before factoring in savings from tax credits and solar incentives. Learn more about the cost of solar.
