Hardrock solar pile driver can drive the pile into soil or rock to support the solar panel for solar power station system and guardrail installation, the common application is for Photovoltaic panels installation. There are several type Photovoltaic rig, from manual rig, to semi-hydraulic pile driving machine to fully hydraulic drilling rig. What is a photovoltaic pile driver?

Photovoltaic Pile Driver Configuration Solar Pile Drilling Method - totally three different drilling procedure for PV drilling as following The pile driver drive the

auger into soil directly by rotating, it is only for the soft ground such as soil, sand, soft clay. When drilling for hard formation like rock, hard clay.

How many types of photovoltaic rigs are there?

There are several type Photovoltaic rig, from manual rig, to semi-hydraulic pile driving machine to fully hydraulic drilling rig Hardrock PV piling machine includes DS100, DS200, DS300, DS300H totally four different model. It can be selected based on the pile shape and depth Photovoltaic Pile Driver Configuration.

How to install a solar pole in a rig?

Rig has to works with air compressor together for percussion drilling. In this way, it can make a borehole firstly, then put the pile inside or concreting a pile. When it needs to install the solar pole in more efficient way and have it stably installed, hammering the pile into ground directly is the best way.
