Puerto Rico proterra battery

Overview

Where are Proterra batteries manufactured?

Proterra batteries are manufactured in Greer, South Carolina. They are designed in Proterra's Silicon Valley and engineered by the best minds in battery technology. Proterra battery systems are safe, reliable, and efficient. Rigorous vehicle testing and validation programs ensure the highest standards of safety. The compact design enables industry-leading energy density, by volume and mass.

Are Proterra batteries safe?

Proterra battery systems are safe and reliable. Rigorous vehicle testing and validation programs ensure the highest standards of safety. They offer a compact design that enables industry-leading energy density, by volume and mass, and are flexible and efficient.

What is a Proterra s series battery?

The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America. Battery packs in the S series have a width of 860 mm and can contain up to 123 kWh of energy storage per pack.

Does Proterra recycle lithium ion batteries?

Instead of sending batteries to a hazardous waste incinerator, Proterra works with top-tier recycling companies that specialize in extracting and repurposing materials inside lithium-ion automotive batteries, recovering precious metals used in Proterra batteries.

Does Proterra have a new battery factory in South Carolina?

Proterra, an EV manufacturer, has announced plans to open a new battery factory in Greer, South Carolina. The company is committing at least \$76 million and creating over 200 new jobs with this new facility to keep up with

demand for its EV battery systems.

How many vicinity batteries will Proterra supply by 2024?

Proterra has contractually committed to supplying at least 600 Vicinity batteries by 2024.

Puerto Rico proterra battery

Battery Technology

Proterra batteries are purpose-built for commercial and industrial applications, proven through 40+ million service miles and 1300+ battery systems delivered to date. Our batteries are designed from the cell level up for commercial and industrial usage and have industry-leading energy density, a flexible design, and ruggedized commercial-grade

EPA Finalizes Cleanup Plan for The Battery Recycling Company ...

NEW YORK - The U.S. Environmental Protection Agency (EPA) has finalized its cleanup plan to address arsenic and lead-contaminated soil, and volatile organic compounds in groundwater at the Battery Recycling Company Superfund Site in Arecibo, Puerto Rico. The final plan, known as a Record of Decision, explains EPA's intention to address remaining ...
