

European Solar and Energy Storage Solutions

Rgs energy group inc Albania

Overview

Who is RGS Energy?

With eight offices from coast to coast (and in Hawaii as Sunetric) and over 25,000 solar energy systems totaling more than 260 MW installed, RGS Energy is one of the oldest, largest, and most trusted clean energy EPC providers in the country. Our mission is to promote the adoption of renewable energy to reduce the human ecological footprint.

What happened to RGS Energy?

RGS Energy hung on as many of the bigger national installers ran out of cash or exited the market: Sungevity, Verengo, NRG Home Solar. SolarCity's meteoric rise ended in a sale to Tesla and a quiet abdication of market share. Sunrun and Vivint have proven to be the rare durable solar installers at a national level.

What happened to RGS solar?

Blessed with a pile of cash at a time when few solar installers had it, RGS went on a buying spree. It acquired regional installers including California outfits Marin Solar, Carlson Solar, Independent Energy Systems and Regrid Power, and it later absorbed New England's Alteris Renewables.

Did solar roofs save RGS?

Solar roofs failed to save RGS. But a piece of it lives on with founder John Schaeffer, who left the company in 2013 and bought back control of the Solar Living Center, a lush compound in Mendocino dedicated to teaching sustainable lifestyles, including solar power, permaculture and natural construction techniques.
