Cook Islands , Pacific Energy

The Pacific Energy Group became established in the Cook Islands in 2010 thanks to the acquisition of the BP assets. Ever since, the Group has renewed its partnership with the power plant TAU and equipped itself with a new refueler to support the business growth. Optimization and quality of supply are also a priority.

Renewable energy in the Cook Islands

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, [1] with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. [2]

Energy in the Cook Islands

The Cook Islands is a net importer of energy, in the form of petroleum products. Total energy consumption was 1,677,278,000 BTU (1.77 TJ) in 2017, of which 811,000,000 (0.86 TJ) was in the form of oil. [1] In 2012 47% of imported oil was used in the transport sector, 30% in aviation, and 27% for electricity generation. [2]
