Rooftop photovoltaic bracket installation size

Overview

How do I determine the right size for my Rooftop Solar Mounting system?

The size of the rooftop solar mounting system depends on a variety of factors, such as the number and size of solar panels, the type of roof, the pitch of the roof, and the weather conditions in your area.

How do I determine the right size for my Rooftop Solar Mounting system?

The size of the rooftop solar mounting system depends on a variety of factors, such as the number and size of solar panels, the type of roof, the pitch of the roof, and the weather conditions in your area.

It has only two parts, mounting bracket and mid or end clamp. Mounting bracket is attached to any 3"x4" or larger flat area on the roof with butyl sealant and secured to the deck or structure using up to four roofing fasteners. Universal mid and end clamps fit almost all solar panels.

Bigger chunks of roof are easier, and cheaper, to install solar panels. Keep in mind that a standard residential solar panel is roughly five and a half feet tall by three feet wide. Pictured below, this 290 to 320 watt solar panel from URE represents a standard residential product.
