Salimo Solar Power

Overview

What is a Salima solar PV plant?

The 75MWdc/60MWac Salima solar PV plant started commercial operations on 15 November, becoming the first solar independent power project in Malawi to connect to the grid and the first large international IPP developed under a new regulatory set-up.

What is the Salima solar project?

The project also engaged a professional chef from Lilongwe to train a team of local women to prepare and serve free, nutritious meals for the construction team each day from the on-site African Food Kitchen facility. The Salima Solar project ties in with Power Africa initiatives in the region which aim to connect more people to the national grid.

Why is Ta funding Salima solar?

TA has also provided a further \$6 million Viability Gap Funding grant to the project to accelerate progress to construction. As the country's first commercial-scale solar IPP, Salima Solar has considerable potential for replication; promoting further development of Malawi's solar resource.

Where is Malawi's first solar power plant located?

The centrally located facility is Malawi's first solar power plant connected to the national grid, a project successfully completed under a public-private partnership (PPP). The President of the Republic of Malawi Lazarus McCarthy Chakwera visited the Salima district, 101 km from the capital Lilongwe, on November 16, 2021.

Who funded Salima?

Salima was funded by JCM Power alongside the Private Infrastructure Development Group's InfraCo Africa and FMO. It was one of four projects awarded following a tender in 2017. Salima's backers were also awarded the

28.5MWdc/20MWac Golomoti project, which is expected online in Q1 2022.

What revolving liquidity guarantee does Salima receive?

Salima is the second project in Malawi (after Nkhotakota) to receive a revolving liquidity guarantee from the African Trade Insurance Agency's regional liquidity support facility.
