# Saudi Arabia solar energy for you

## Overview

---

Solar power in has become more important to the country as oil prices have risen. Saudi Arabia is located in the Arabian Peninsula, where it receives 12 hours of sun a day. Saudi Arabia has the potential to supply its electrical needs solely with solar power. As the largest oil producer and exporter in the world and one of the largest carbon dioxide producers Saudi Arabia wo.

Why is solar power important in Saudi Arabia?

Solar power in Saudi Arabia has become more important to the country as oil prices have risen. In 2021, 60.89% of energy consumed was produced by burning oil.

Where in Saudi Arabia is solar power coming from?

Key locations include Sakaka in Al Jouf Province, Al Shuaibah in Makkah Province, and Sudair in Riyadh Province, among others. These projects capitalize on Saudi Arabia's geographical position and favorable weather conditions to generate solar power. Solar energy is set to expand nationwide.

Why is Saudi Arabia investing in solar energy?

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable growth by reducing oil dependency and investing in renewable energy.

How much solar power will Saudi Arabia have by 2032?

The Saudi agency in charge of developing the nations renewable energy sector, Ka-care, announced in May 2012 that the nation would install 41 gigawatts (GW) of solar capacity by 2032. It was projected to be composed of 25 GW of solar thermal, and 16 GW of photovoltaics.

Is solar energy sustainable in Saudi Arabia?

The transition to solar energy in Saudi Arabia represents a multifaceted approach to sustainability, addressing the triple bottom line (TBL) of social,

ecological, and economic aspects. Social Equity: The move towards solar energy is significantly enhancing social equity in Saudi Arabia.

Is solar energy the cheapest source of electricity in Saudi Arabia?

The Saudi government is set to raise electricity prices to market levels by the mid 2020's. At the commercial and industrial scale, solar energy is now the cheapest source of power for most on-grid and off-grid energy consumers.
