

European Solar and Energy Storage Solutions

Serbia positive solar llc

Overview

Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace.

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

Why is solar energy important in Serbia?

Solar energy offers a practical, scalable solution for diversifying energy sources. This shift to solar not only benefits the environment but also strengthens the economy by fostering a local green energy supply. Serbian industries can rely on this domestic energy source, cutting down on costs tied to fossil fuel imports.

Does Serbia have a green energy strategy?

This groundbreaking project, led by the Hyundai Engineering and UGT Renewables consortium, marks a significant shift in Serbia's energy strategy. Serbia aims to boost green energy, reduce fossil fuel reliance, and stabilize its energy grid through this ambitious initiative.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network.

Serbia currently gets more than 60% of its electricity from fossil fuels.

Why should Serbia invest in a solar grid?

An interconnected grid also allows Serbia to better distribute energy, meeting future demands while maintaining grid stability. Looking ahead, this solar initiative will generate jobs, stimulate economic growth, and position Serbia as a leader in the regional green energy market.

RES SERBIA 2024 (III panel 24.9.): 130 MW of solar power plants

Dunja Grujić, Head of the Sector for the Market Support at Elektro distribucija Srbije has revealed that 171 solar power plants with an installed capacity of 60 MW are currently connected to the distribution system of Serbia. If you add 70 MW of 3,600 prosumers, a total of 130 MW of solar is connected to the distribution system.

Serbia: Hyundai and UGT to build utility-scale solar power plants

The group of bidders consisting of the companies Hyundai Engineering Co.LTD, Hyundai Eng. America Inc. and UGT Renewables LLC. will be strategic partners of the state for the construction of large-capacity solar power plants, according to the decision of the Government of Serbia.. Hyundai and UGT Renewables will build the state's large-capacity solar power plants
