

European Solar and Energy Storage Solutions

Solar Astronaut Bracket

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT
IN OFF-GRID MODE

✓ CONVENIENT OPERATION
& MAINTENANCE

✓ PRE-WIRED

Overview

Will new solar arrays boost the Space Station's power?

NASA astronaut Shane Kimbrough and European Space Agency astronaut Thomas Pesquet installed new solar arrays during a six-hour spacewalk on Sunday, providing an increase in power to the space station. The spacewalk came after facing "technical delays" during a previous spacewalk on Wednesday.

Where did NASA astronauts install solar array modification kits?

In the third spacewalk of the year outside the International Space Station, the two NASA astronauts began work to install modification kits required for upcoming solar array upgrades. The duo worked near the farthest set of existing solar arrays on the station's left (port) side, known as P6.

Did NASA upgrade solar array outside the International Space Station?

Two NASA astronauts deployed the sixth and last (for now) upgraded solar array outside of the International Space Station, increasing the orbital laboratory's power supply while tying an American spacewalk record.

Will a solar array power the International Space Station?

The new solar array deployed Friday will produce electricity for the space station's 1A power channel. Artist's illustration of the International Space Station with three sets of new roll-out solar arrays.

What will NASA's solar arrays do for the Space Station?

NASA is planning to order a final pair of roll-out solar arrays to complete the space station's electrical upgrade, which will ensure the lab has enough power to support research through the station's planned retirement date in 2030.

Where will solar panels be installed on the International Space Station?

Artist's illustration of the International Space Station with three sets of new roll-out solar arrays. The solar arrays on the SpaceX CRS-28 mission will be installed on the starboard side of the space station's football field-long power truss, labeled here on Channels 1A and 1B of the electrical system.
