Solar Photovoltaic Panel Lease and Sales

Overview

What is solar leasing?

Solar leasing is a financing option through which customers pay a monthly fee for the panels and get to use the power the system produces. They do not, however, own the panels.

How do solar leases and PPAs work?

Solar leases and PPAs work similarly. With these financing options, instead of buying a solar panel system, you can lease it for 20-25 years and still receive the energy produced by the panels. During this time, you pay the solar leasing company for the benefits of the solar panel system (i.e., the solar electricity powering your home).

Should you buy or lease solar panels?

Buying solar panels requires an investment and more decision-making than leasing, but over the long term the benefits of owning your system are hard to beat. Buying your solar electric system outright is best.

Do you pay a solar leasing company?

During this time, you pay the solar leasing company for the benefits of the solar panel system (i.e., the solar electricity powering your home). However, because the solar leasing company owns the equipment, they are responsible for maintenance.

Should you lease a residential solar system?

The steep up-front costs for a residential solar system can make a leasing company's sales pitch sound pretty appealing: Pay little or nothing and save hundreds of dollars per year on average. (The premise is that you save because the combination of your lease payment and your electric bill is less than what you currently pay for power.).

Can you sell a solar system if you leased?

Solar lease: If you leased your solar system, there are two main ways you can handle the lease when selling your house. Buy out the remainder of the lease: When buying out your lease, you can either have the panels removed from your roof or keep them there and sell the system as part of the property.
