Solar Photovoltaic Panel Wire Mesh

Overview

Can you put wire mesh on a solar panel?

Manufactured by Heyco Products, these kits of PVC-coated wire mesh and accompanying stainless steel clips can be installed on almost all solar panel systems to provide protection against unwanted birds, pigeons, and furry creatures.

What is a solar mesh guard kit?

The Solar Mesh Guard Kit is designed to keep pest birds and rodents from getting under solar panels and damaging the roof and electrical wiring. This system securely protects panels by creating a physical barrier that excludes pests from solar panel mounting areas.

What is bird-X solar mesh guard kit?

Bird-X Solar Mesh Guard Kit is designed to prevent birds and rodents from accessing the area beneath your PV panels and causing damage to your roof and the panels' electrical wiring. It creates a barrier that keeps pests away from the mounting area of the panels. You can attach it to panels without causing harm or voiding their warranty.

What is a solar mesh screen?

Our solar mesh screen is the perfect complement to your solar panels, ensuring that they stay bird-proof and in top working condition for years to come. Protect your investment and the planet with MAPORCH, and pave the way for a greener, more sustainable future.

What is a clip and wire mesh system?

The clip and wire mesh system is used to prevent pest birds and animals from getting behind solar panels and damaging the electrical or mechanical systems. It consists of a 19 gauge black PVC coated wire with a 1/2" mesh, which is fastened to the outside perimeter of the panels using a specialized

clip that slips over the lip of the solar panel frame.

How to protect solar panels from birds?

You can prevent all this by following some easy ways of bird proofing solar panels. It provides much-needed protection against birds as their droppings can accumulate on solar modules over time, blocking sunlight, and hence reducing the overall efficiency of panels.
