# Solar Power Cycling Tour

## Overview

---

Are solar panels a good option for bike touring?

Solar panels can be a great addition to any bike touring gear list and make a convenient camping companion. Allowing you do be essentially off the grid, and be up in the mountains charging your devices, to continue to get you on your way. But it is not all sunshine and rainbows. Whoops. Pardon the pun there!.

How many watts a solar panel should a bike tourer use?

The watt amount of your solar panel is also important, you don't want a small solar panel that only pumps out a couple watts. Most bike tourers use anything around 20 watts or higher. Also depending on your charge load you could get away with a lower amount like a 10W.

Are solar-powered electric bicycle rides sustainable?

Solar-powered electric bicycle rides have proven to be popular choices for raising awareness of sustainable energy for transportation. While solar-powered electric cars are making progress, the efficiencies required to supply enough energy to the more powerful vehicles often result in wacky designs.

Can a solar panel be mounted on a bike?

If you have the solar panel mounted on your bike while riding. The direction your panel is facing to the sun, any shade and other factors when riding around and always changing directions will effect the power you end up accumulating. The Goal Zero Nomad Plus range comes in three different models the 7, 14 and 28 watt.

Are solar panels good for bikepacking?

If you are heading of on a week long bikepacking adventure it the mountains, and the weather is forecasted for sunny days, you should be all good. Keep in mind that solar panels charge your devices slower then the performance you

could get out of a wall charge, at a coffee shop or something. The time available to charge is a consideration.

How to store an electric touring bike?

Avoid storing your electric touring bike with a low or dead battery. You should avoid running the battery down to 0%. Instead, try to charge it when it reaches 20%. The battery is one of the most expensive parts of your e-bike. You want to take care of it to get the most life out of it.
