# Solar Street Light Panel Bracket

## Overview

---

What is a solar panel mounting bracket?

Refer to section “Installation handover” This solar panel mounting bracket is a robust and versatile galvanised mild steel bracket suitable for mounting a variety of solar panels between 20W and 150W in size, against a wall or on a post.

What components are used in a solar street light system?

In most typical solar street light systems, the following components are used: the solar panel assembly, which is made up of the solar panel, mounting bracket, and hardware.

Which solar street lights are the best?

When it comes to solar street lights, LED fixtures are the most popular pairing for the solar power assembly; however, other lamp options are still available. The light fixture should provide the needed light levels on the ground for easy visibility while providing the most efficient lighting possible.

Is solar street light a good product?

Solar street light is a good product to save energy and protect environment. JD-198 solar light is used high quality material, through rigorous testing, specially designed for outdoor high-power lighting. It brings you the convenience of no-wire lighting and enjoyment of life, and can also reduce carbon emissions indirectly.

How is a solar panel mounted to a pole?

To mount a solar panel to a pole, you need to install a solar panel mounting bracket assembly on the solar panel. Using an all aluminum bracket design with stainless steel hardware ensures that the solar panel assembly will stand up to the test of time, especially in harsh environments prone to rust and degradation.

How often do solar street lights need to be replaced?

Solar street lights typically only require maintenance every five years or more; the battery box and light controls are located inside the battery box and provide the on and off functionality of the solar street light system.
