Solar bracket installation curtain

Overview

How do I install a valance on a roller / solar shade?

Mounting Your Roller / Solar Shades with Upholstered Valance: Outside Mount: Install the brackets: The valance will be hung / attached to the window frame or wall with the “L” brackets included. Attach the brackets to the wall or window frame at the desired height.

How do you install a shade bracket?

Before drilling the screw in and securely tightening the bracket to the mounting surface, make sure that the plastic tab on the bracket is facing upward/ towards the ceiling. 2A. Inserting The Shade Into The Brackets: Insert the rail into the front of the bracket. Rotate the shade until the back side of it snaps into the back of the bracket.

Can solar shades hang over a door?

Solar shades that hang over a door (or an open window) may flap around if not secured. This can be easily fixed by installing hold down brackets at the bottom of the window or door. These brackets are usually a small piece of plastic or metal that hooks or latches into the bottom rail of a shade to anchor it.

Can solar shades be installed on a ceiling?

Most solar shades can be ceiling mounted (where the brackets are installed onto the ceiling instead of a wall or window frame). Often, the installation brackets that are included are considered universal. This means they can be installed in multiple different ways, simply by rotating the bracket or using different screw holes in the bracket.

How do you install a shade on a wall?

With a pencil mark the wall on the side of one bracket. Remove shade and then attach the one bracket with two screws. Next, insert the shade into the

second bracket. Hold shade up and insert other end into the already mounted bracket making sure that the shade is level. Mark the wall on the side of the second bracket.

How do I install window brackets?

1. Installing Your Brackets: Installing Inside Mount: The brackets will be attached to the top of the window frame (or ceiling) as shown. The outermost brackets should be installed approximately 2" in from the edge of the window frame. Any remaining brackets will be spaced out evenly in between the outermost brackets.
