

Overview

Which companies have solar carports?

Here are just a few examples: In 2014, Whole Foods constructed 325 kW of solar power at their site in Brooklyn, NY, covering their entire parking lot in solar panels. Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL.

How many solar carports are there in the UK?

There are over 17,000 parking facilities in the UK and the sector generates £1.5 billion per annum. Who Can Use Solar Carports?

At Empower we complete various domestic and commercial solar installations across the country.

What is a residential solar carport?

A residential solar carport combines the carport concept with a ground-mount solar panel array. It's a fantastic dual-use structure, providing you with ecologically-friendly power, whilst protecting your car from the elements. Where can you find one in the wild?

If you've seen a solar carport, it was probably in a commercial parking lot.

Where are solar carports installed?

Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL. Rutgers University generates 60% of their annual energy requirements from an immense array of solar carports — generating an incredible 8 megawatts of power from their 28 acre parking lot. Why do people install them?

.

How much does a solar carport cost?

After accounting for the 30% federal tax rebate, the solar carport is going to set you back by \$14,350 — compared to \$12,600 for a roof mounted solar system. I've made a few other assumptions — our imaginary average home is using 10,821 kWh per year, and is sited somewhere where with the national median amount of insolation (energy from the sun).

Why should you choose a solar carport?

Our solar carport solutions not only provide “green” energy for charging electric or hybrid cars but also for feeding in supplemental electricity into power circuits or to charge even entire company fleets. The semi-transparent solar modules made of high-performance solar cells ensure for an optimum solar yield on the surface available.
