Applications

Santiago 5 MW Solar PV development, Cape Verde

The development of the Renewable Energy Atlas of Cape Verde, in 2010, made it possible to identify several locations on the island of Santiago for the development of solar power plants, which allowed the existing solar potential to be harnessed, reducing the country's costs.

Cabo Verde

Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar. Although 93 percent of the population has access to electricity, there are significant losses in the distribution grids, and electricity costs are extremely high.

Prosol - Renew Your Energy

Acreditamos acesso universal de todos os consumidores à tecnologia solar e na democratização da geração de energia. A energia solar é a fonte de energia mais proeminente que pode levar a um ambiente de geração de energia limpa, sustentável e descentralizada.
