Solar panel power generation maintenance

Overview

The best thing you can do to maintain your solar system is to monitor its production so you can quickly identify and address issues, should they arise. “You should check on your system about once a month to make sure there are no anomalies or panels underperforming — maybe a bit more if your system is charging your.

In many cases, cleaning your solar panels should be very hands-off. “In environments with periodic rain, that rain going to wash away any dust, soiling, or bird droppings,” Lynch said. In fact, even.

The beauty of solar panels is their simplicity. In fact, photovoltaic solar is the only source of electricity that doesn’t involve spinning a turbine! That’s part of what makes them the only.
