Solar panel reel

Overview

What is a solar reel?

A solar reel is a companion to any solar blanket purchase and makes deploying and storing your solar cover convenient and simple. Raise your water temperature by as much as 15 degrees with the power of the sun and an In the Swim solar blanket! A solar cover saves you money and extends your swimming season.

What is a solar cover reel?

A solar cover reel is a way to: easily deploy your solar cover whenever your pool's not in use. easily uncover your pool when you're ready to use it. temporarily store your cover until you're ready to put it away for the winter.

Do You Need a Reel For Your Solar Cover?

Honestly, no.

Do you need a solar cover reel?

Solar cover reels have proven to be a fast and reliable way to handle your pool's solar cover. Whether you have an inground or above ground pool, deploying, retracting, maneuvering and storing your solar cover has never been easier than with a reel. Reels come in a variety of sizes, styles and materials to suit your individual needs.

How do I choose a solar cover reel for my Pool?

There are several choices to pick from for both in-ground and above-ground pools. Most in-ground solar cover reels are designed to fit under diving boards and is portable making the easy to store away. You can also get a powered solar cover reel that has a motor that plugs into a standard outlet for your in-ground pool.

How do solar pool cover reels work?

Solar pool cover reels usually come with two types of fasteners that actually connect your pool cover to the reel itself. These are either embedded straps or hook-and-loop straps: Embedded straps connect directly to the reel by drilling and screwing them in place.

How do you attach a solar cover to a reel?

Next, use the attachment kit to connect the cover to the reel. Begin by placing the plates approximately 2" to 3" from the end of the solar cover, evenly spacing them across its width. Then, fasten the straps using Velcro, sliding them through the plates.
