solar panels | 206.8M views. Watch the latest videos about #solarpanels on TikTok. Is TikTok a good lead generation platform?

When users are buying their first home, that's the best chance to snag them as clients. And since TikTok is a discovery-focused platform, with relevant content popping up in people's feeds, it's a great way to build trust and reach all at once. This characteristic makes it a highly effective lead generation platform .

Why is TikTok so popular among Generation Z?

Marketers and companies have shifted advertising campaigns onto the

platform in effort to target the Generation Z consumers, as young people predominantly obtain news and information on social media. TikTok has been used by young people to combat boredom while under quarantine due to the virus.

Are young eco-influencers racking millions of views on TikTok?

Dance routines and cat memes are usually what goes viral on TikTok. But now young eco-influencers are racking up millions of views with videos on everything from trash to the rights of nature.

Is TikTok a participatory platform?

Cabrera disagrees. TikTok is a participatory platform that allows users to easily borrow, repurpose and answer each other's videos. She says her viewers get in touch to let her know they're taking action by, for example, signing petitions or making small changes to their habits.

Is TikTok a place for climate activism?

Sophia Moore, an 18-year-old high school student and TikTok user in California, is active in various environmental and social justice causes but thinks the platform isn't the place for climate activism. "I think most people use TikTok as a form of mindless entertainment, to escape from school," she said.

How does TikTok work?

TikTok is a participatory platform that allows users to easily borrow, repurpose and answer each other's videos. She says her viewers get in touch to let her know they're taking action by, for example, signing petitions or making small changes to their habits. But it's not all about individual responsibility, she adds.
