Solar power is a good buy

Overview

If you think you might move before you reach your payback period, purchasing a solar system may not be worth it. Instead, consider community solar, which doesn't lock you into a long-term investment. However, adding a solar system can still benefit you financially if you move.

If you think you might move before you reach your payback period, purchasing a solar system may not be worth it. Instead, consider community solar, which doesn't lock you into a long-term investment. However, adding a solar system can still benefit you financially if you move.

Buying a solar energy system will likely increase your home's value. A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array.

Our guide will shed a ray of light on everything you need to know about solar energy, from solar panel pros and cons, costs and more, to help you decide if investing in solar is worth it for.

If you're thinking about offsetting both your environmental impact and power bill by adding solar power to your home or business, our guide on solar energy's pros and cons can help you.

Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime. Most people go solar for economic benefits, but the other benefits of solar may pleasantly surprise you. Are solar panels worth it?

If you install solar panels now at an average cost of \$20,000, you can save more than \$40,000 over the next two and a half decades. The bottom line is that solar panels are almost always worth it if you own your home and have an electric bill. How much money you can save varies for every property. How much will you save with solar?

Is going solar worth it?

If you don't have high energy costs or your state makes it harder to go solar, it might not be worth it financially. Even after weighing all the pros and cons, the decision to go solar is a highly personal one.

Should you buy a home with solar?

By going solar and reducing your utility demand, you can shield yourself from rising energy costs. Homes with solar generally sell for more than homes without (by 4% on average!).

Are solar panels a good investment?

Solar panels are one of the smartest investments a homeowner can make, especially as the cost of electricity is rising across the country. While average electricity rates increase about 2.5% every year, the benefit of going solar is that you don't have to worry about climbing energy costs anymore.

Are solar panels a good option for your home?

Residential solar panels allow you to pull less energy from the grid. With the addition of solar batteries, solar panels could make your home self-reliant and independent from the electric grid. Solar batteries store energy created during sunny hours, allowing it to be used at night or on cloudy days.

Does going solar cost a lot?

Thanks in part to Solar Energy Technologies Office (SETO) investments, the cost of going solar goes down every year. You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy.
