# Solar power pricing

## Overview

---

The cost of solar panels is dependent on the solar panel company you choose. From the solar equipment system itself to installation costs and add-ons, the price will vary from company to company, and the first step is to consider your options for the best solar companies.

How many solar panels you need to fully power your home usually falls around the 20 to 25 mark, but this number can range from 15 to 34 solar panels.

The federal solar tax credit is a rebate applied to your tax return as a tax reduction. For solar panels purchased between 2022 and 2032.

Not all solar panels are alike. Some solar panel manufacturers produce solar panels with higher efficiency ratings than others. For example, we found SunPower in-house solar panels are nearly 23% efficient compared to other solar.

Again, the type of solar panels you choose plays a role in the material costs of your solar system, with prices varying from \$0.90 to \$1.50 per watt. Monocrystalline solar panels tend to have.

Most people will need to spend between \$16,500 and \$25,000 for solar panels, with the national average solar installation costing about \$21,816.

Most people will need to spend between \$16,500 and \$25,000 for solar panels, with the national average solar installation costing about \$21,816.

The average US cost to install solar panels totals \$31,558. Financial incentives are available to offset the overall price.

Solar panels cost homeowners an average of \$31,460 but typically ranges from \$27,000–\$32,000 for a 2,000 square foot home. See which factors will impact your total cost.

For most homeowners, the decision to install solar panels is primarily driven by cost. The average cost of solar panels as of Spring 2024 was \$3.40 per watt, excluding financing.

As an example, we'll use U.S. averages: Average cost of an 8.6 kW solar system: \$31,558  
Installed cost after factoring in the 30 percent tax credit: \$22,091  
Annual energy bill: \$1,750  
How much does solar cost per watt?

We often reference the cost-per-watt (\$/W) of solar to compare the value of a quote against the national average. According to the most recent data from the EnergySage Marketplace, the average cost-per-watt across the U.S. is around \$2.75/W before incentives.

How much does a solar panel cost?

Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300. The cost of a solar panel also depends on how you buy it. If you purchase through a full-service installer, you will likely get a lower price for each panel than buying them individually from a retail store.

How much do solar panels cost in 2024?

Here's an explanation for The average solar panel system in 2024 costs about \$31,558 before factoring in tax credits and solar incentives. The Residential Clean Energy Credit is part of the Inflation Reduction Act and offsets the total cost of solar panels by 30 percent when you file your annual federal tax return.

How do you price solar panels?

In our expert opinion, the most effective and accurate method for pricing solar panels is the gross cost. Let's explain why and then discuss each pricing model in detail. A lot of work goes into ensuring that you can safely turn on your solar power system—the process is much more involved than simply attaching solar panels to your roof.

Why do solar panels cost so much?

The more solar panels you install, the higher the installation cost because the process takes more time and labor. Depending on your location, the sales tax or hourly labor wage may be greater, increasing the total solar cost. Installation is one of the many factors that determine the overall price.

How much do solar panels cost in New Mexico?

Most homeowners will recover the cost of their solar panels in electric bill

savings in 8.5 years, resulting in savings of \$25,260 over the lifetime of their system. Homeowners in New Mexico have the cheapest solar panel costs, with an average price of \$9,996 after using the federal solar tax credit.
