Solution to poor power supply inia Timor-Leste

Overview

How much did Timor-Leste invest in a new power system?

Timor-Leste's power stations and distribution lines, showing the Power Distribution Modernisation Project. The initial capital investment in the new power system was reported as US\$2 billion for the main power stations and distribution lines.

Does Timor-Leste have access to energy?

DILI, Timor-Leste, Feb 08 (IPS) - Access to energy remains a concerning challenge for many in Timor-Leste. The centralised nature of the local electricity supply chain has traditionally kept consumers reliant on the national grid to overcome chronic energy shortages.

Does predp paved the way for future energy access in Timor-Leste?

Conclusions Although PREDP was a pilot programme, it has paved the way for future energy access activities in Timor-Leste. It was the first rural energy programme in Timor-Leste to include a capacity development component, and to have the GoTL and local communities as major partners.

Why did Timor-Leste lose electricity?

Most of the energy infrastructure that existed when Timor-Leste was part of Indonesia was destroyed during the violent outbreaks of 1999. At the time of independence in 2002, electricity access was estimated to be just 24 % of the population .

Does Timor-Leste's electricity network support water security?

Interview findings suggested that the existing electricity network in Timor-Leste, with noted excess capacity, provided a largely untapped potential for supporting irrigation needs, such as groundwater pumping, to enhance water security.

What are the main sources of energy in Timor-Leste?

Fossil fuels in Timor-Leste are imported from neighbouring countries such as Indonesia and Australia. Seventy-five percent of oil imports are used for electricity production, with the remaining 25 percent consumed in the transport sector. Other sources of energy. Lighting needs are met by the use of kerosene, plant oils and batteries.

institutional strengthening and capacity building to Electricidade De Timor-Leste (EDTL).a The project will support EDTL's focus on the development and operation of the power supply in Timor-Leste. The project outcome includes improving efficiency and reliability of power supply in Timor-Leste and financial performance

of EDTL.

The future of hydropower development in Timor Leste

The current PLN power supply plan calls for the construction of five additional power generating facilities in West Timor by 2020, with 197 MW of total installed capacity. Four of the new facilities, ranging in size from 30 to 80 MW, will be near Kupang; the fifth is a 24 MW facility in Atambua not far from the Timor Leste frontier.

Voltage in East Timor (Timor Leste)

These solutions are often expensive and unreliable, with frequent power outages and high maintenance costs. The government is aware of these issues and is working to address them through its electrification plan. One of the main challenges facing the electricity supply network in East Timor is its ageing infrastructure.
