Samcheok leads the way in advanced ultrasupercritical CFB

Construction is nearly complete and commissioning is underway at the Samcheok Green Power Project in South Korea. In addition to deploying wind, solar, wave and hydro power, the plant will use what is claimed to be the most advanced CFB (circulating fluidised bed) technology in the world, capable of co-firing a wide range of coals with biomass.

The November 2017 Mw 5.5 Pohang earthquake: A possible case ...

On 15 November 2017, a moment magnitude (M w) 5.5 earthquake struck South Korea, injuring ~70 people and causing extensive damage in and around the city of Pohang. This earthquake was preceded by the M w 5.5 Gyeongju event of 12 September 2016, which occurred ~30 km farther south on a major right-lateral fault, the Yangsan fault, which continues ...

Electrical convector heater ARDESTO CHK-2000MW

ARDESTO CHK-2000MW has three power levels to create an optimal temperature mode in the room: 750, 1 250 and 2 000 W. Adjustment is mechanical, a rotary wheel is built into the side surface of the case. In addition, it is possible to adjust the thermostat operation (two modes). The device is free-standing, intended for floor installation, and

South Korean Power Plant Starts Operation with GE

Vernova

Korea Southern Power Co. (KOSPO) started operation at the Shinsejong combined-cycle power plant in Sejong Multifunctional Administrative City, South Korea using GE Vernova's 7HA.03 gas turbine. The combined-cycle plant represents GE Vernova's 100th HA-class commissioning and the first 7HA.03 gas turbine in South Korea.

Bloom's first Korean utility-scale CHP plant

US-based Bloom Energy has announced its first combined heat and power (CHP) project, in collaboration with SK ecoplant (formerly SK Engineering and Construction). The 4.2 MW installation will be South Korea's first utility-scale solid oxide fuel cell CHP initiative.

South Korea Power announced on the 22nd that it was the only ...

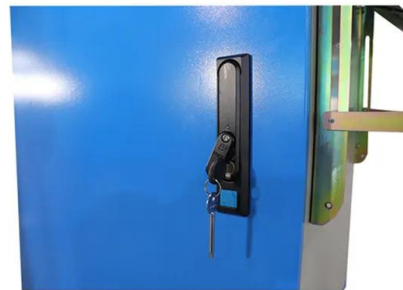

South Korea Power announced on the 22nd that it was the only bidder among all bidders to be selected as the preferred bidder in the 2024 competitive bid for clean hydrogen power generation organized by the Korea Electric Power

Exchange.

Converting an aging coal-fired power plant to H-class technology ...

This power plant will add new capacity, expected to increase power supply security in South Korea while continuing to phase out coal power generation. In addition, it will help expand a more reliable deployment of renewable energy resources in our country as we'll be more capable to dispatch power quickly in response to grid fluctuations.
