Stainless steel photovoltaic bracket

Overview

What are photovoltaic brackets for glazed tile roofs?

Photovoltaic brackets for glazed tile roofs provide a secure and aesthetically pleasing solution for mounting solar panels on tile roof surfaces. These brackets are designed to blend in with the roof tiles, preserving the aesthetic appearance of the building while providing reliable support for the panels.

How do you install a protea bracket on a metal roofing panel?

The ProteaBracket is mounted directly onto the crown of the roofing panel, straddling the profile. No surface preparation is necessary. Peel adhesive backing and apply bracket to the metal roofing panel.

Does the proteabacket come with a rubber sealant?

The ProteaBracket comes with a factory-applied EPDM adhesive rubber sealant on the base that ensures quick weather-proof installation. There are no messy sealants to apply and no chance for leaks. The factory applied adhesive rubber sealant ensures quick installation and a weather-proof fit.
