## Overview

---

What are El Salvador's green energy ambitions?

El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

Does El Salvador need a regional energy strategy?

El Salvador benefited greatly from regional energy integration and plays an active role in the MER. The country should therefore incorporate the Regional Energy Strategy 2030 in its national long-term planning efforts. This is in line with the country's overall development strategy and assures the participation of both public and private sectors. 2.

Is biomass a good energy source in El Salvador?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. El Salvador: How much of the country's energy comes from nuclear power?

Nuclear energy - alongside renewables - is a low-carbon energy source.

Could El Salvador develop a more comprehensive national energy plan?

Yet rapid renewable energy development has highlighted insufficient coordination in terms of long-term energy plans. El Salvador could devise a more comprehensive national energy plan, encompassing all technologies, suppliers and consumers through an integrated analysis of current market conditions.

Does El Salvador use geothermal energy?

Despite having a long tradition of geothermal energy use, El Salvador's geothermal development has stagnated in recent years, with a limited number

of new projects for geothermal power generation, or heating applications.

How much electricity does El Salvador have?

As of 2020, El Salvador's total installed electrical capacity was 2360 MW, fueled by a mix of fossil fuels (32.67%), hydro (24.31%), solar (20.10%), biomass (12.44%), geothermal (8.66%), wind (1.53%) and biogas (0.29%).
