Svalbard and Jan Mayen generator powered by solar

Overview

What is the difference between Svalbard and Jan Mayen?

Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty. Jan Mayen is a remote island in the Arctic Ocean; it has no permanent population and is administered by the County Governor of Nordland.

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice — the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

What is the population of Svalbard and Jan Mayen in 2021?

Svalbard and Jan Mayen had a population of 2,939 in January 2021. There were 1,542 internet users in January 2021.

What is Unis & Svalbard Energi doing in the Arctic?

The energy company is collaborating with the University of Svalbard (UNIS) and Svalbard Energi in the testing of hybrid renewable energy, battery storage, and diesel generator systems, with a plan to implement them in many of the 1,500 Arctic communities that are off-grid and currently use coal or diesel as an energy source.

Who governs Svalbard?

The archipelago is administered by the Governor of Svalbard, which is subordinate to the Norwegian Ministry of Justice and Public Security. Unlike the rest of Norway (including Jan Mayen), Svalbard is a free economic zone and a demilitarized zone, and is not part of the Schengen Area nor the European Economic Area.

When did Svalbard become part of Norway?

The Svalbard Treaty of 1920 recognizes Norwegian sovereignty, and the 1925 Svalbard Act made Svalbard a full part of the Kingdom of Norway.

Svalbard and Jan Mayen generator powered by solar

Testing out the power of solar energy in Svalbard, Norway

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy. The company has installed 360 solar panels along with a battery bank and thermal storage system at Isfjord Radio, an old shipping radio station.

Svalbard Airport , Maxeon Solar Panels , SunPower Global

With an electricity price on Svalbard that is three times higher than in mainland Norway, installing PV on Svalbard is a good investment with an expected average payback time of less than eight years, according to Halvorsen. The Power Controls Team installs Maxeon panels on the airport terminal façade.

Mitsubishi Power gains contract for 500MW power plant in ...

The generators for the plant will be produced by Mitsubishi Generator, a company established through the merger of MHI and Mitsubishi Electric Corporation's power-generator systems businesses. The Miri GTCC power plant is a pivotal project under the Sarawak Gas Roadmap, aimed at transforming Sarawak into a high-income state by 2030.

Energy solution: Renewable proposal for Svalbard

The report contains a number of proposals for future energy solutions, including a gas-fired power plant based on LNG, a thermal power plant based on pellets, and gas power combined with solar power. However, the consultants' report contains few proposals for renewable energy solutions for the Svalbard community.
