Tajikistan home power solutions picea

Tajikistan home power solutions picea

The first solar-hydrogen system for your home

picea is installed in your single-family home and supplies you with CO₂-free electricity up to 100% around the year and around the clock. picea is powered only by the sun via photovoltaic modules on the roof. Your solar power becomes usable as green hydrogen all year round. With picea you complete your personal energy turnaround.

Picea

100x more storage capacity than currently available home storage batteries; Twice as much power than other systems; 100% real independence; 100% transparency; 100% renewable; HPS allows you to maximize your independence. All energy produced is efficiently stored and converted. Get the best out of your photovoltaic solar system with HPS.
