# Tax points stipulated for photovoltaic panels

## Overview

---

The installation of the system must be complete during the tax year. Solar PV systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the ITC, raising it to 30% for the installation of which was between 2022-2032.

The installation of the system must be complete during the tax year. Solar PV systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the ITC, raising it to 30% for the installation of which was between 2022-2032.

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. On this page. How it works; Who qualifies; Qualified expenses; Qualified clean energy property; How to claim the credit; Related resources; How it works.

The answer depends heavily on your specific circumstances. The IRS states in Questions 25 and 26 in its Q&A on Tax Credits<sup>13</sup> that off-site solar panels or solar panels that are not directly on the taxpayer's home could still qualify for the residential federal solar tax credit under some circumstances.

Make sure you are installing qualified energy property: Solar electric panels; Solar water heaters (certified by the Solar Rating Certification Corporation or a comparable entity endorsed by your state) Wind turbines; Geothermal heat pumps (meet Energy Star requirements in effect at the time of purchase) Fuel cells.

For example, if your solar PV system was installed in 2022, installation costs totaled \$18,000, and your state government gave you a one-time rebate of \$1,000 for installing the system, your federal tax credit would be calculated as follows:  $\$18,000 * 0.30 = \$5,400$ . State Tax Credit. Can I get a tax credit for a solar PV system?

Under the ITC, the Internal Revenue Service (IRS) provides nonrefundable tax credits for energy improvement upgrades to your home or rental property,

such as installing a solar photovoltaic (PV) system. The ITC was extended in 2022 thanks to the passage of the Inflation Reduction Act.

Can I claim a solar tax credit if I sign a PPA?

You cannot claim the credit if you are leasing or in an agreement to purchase electricity generated by the system, including a solar power purchase agreement (PPA). If you sign a solar lease or PPA, the system owner can claim and keep the federal tax credit and any local incentives.

How does a utility rebate affect a solar tax credit?

When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit. For example, if your solar PV system installed in 2022 cost \$18,000, and your utility gave you a one-time rebate of \$1,000 for installing the system, your tax credit would be calculated as follows:

How much solar tax credit can I claim if I owe taxes?

For example, if you installed solar panels on your home in 2024 and paid \$10,000, you could claim 30% or \$3,000. So, if you owe \$2,000 in taxes, you can apply \$2,000 of your solar tax credit to reduce your tax liability to \$0 for that year. You can then carry forward the remaining \$1,000 to apply to future tax returns.

Can I claim the federal solar tax credit on my rental property?

If you sign a solar lease or PPA, the system owner can claim and keep the federal tax credit and any local incentives. Type of residence: Homes, mobile homes, houseboats, condominiums and cooperative apartments are all qualifying residences for the ITC.

Can I claim a tax credit for an off-site solar project?

Notes: the IRS issued a statement (see link above) allowing a particular taxpayer to claim a tax credit for purchasing an interest in an off-site community solar project. However, this document, known as a private letter ruling or PLR, may not be relied on as precedent by other taxpayers.
