

European Solar and Energy Storage Solutions

The Gambia un boxes for lithium batteries

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:
216KWH (customizable)

EMS communication:
4G/CAN/RS485

Overview

What is a lithium battery shipping box?

The lithium battery shipping boxes are suitable for non-certified batteries, prototypes, battery cells, battery modules and batteries in equipment. For increased part protection, the batteries are stored in layers using customised interior packaging solutions that are developed to safely hold dangerous goods.

What is a lithium battery packaging?

This packaging is just one of our growing range of lithium battery packagings, tested and approved for shipping lithium ion or metal batteries and suitable for all modes of transport. Packaging is supplied without labels. These can be order separately here This specific packaging enables shippers to transport total packaging weight of up to 13kg.

Can ionpak transport lithium-ion batteries safely?

The ORBIS IonPak is suitable to transport lithium-ion batteries safely. The UN approved packaging is certified for solid dangerous goods in a variety of different industries. With a robust outer packaging, customised interior packaging and dust cover, our lithium battery shipping boxes optimise product flow in industrial supply chains.

What is a lithium battery package?

Our lithium battery packages are specially tested and approved to pack lithium ion batteries which feature a strong external layer that are able with withstand falls up to 1.2m with no damage dealt to its contents.

What are the legal requirements for packaging lithium ion batteries?

The legal requirements of packaging lithium ion batteries are drawn up by the United Nations and are registered under the code UN3480. These regulations specify which materials you can use, what type of packaging is suitable for

lithium ion batteries and what packaging instructions you have to follow.

What is a lithium battery?

Lithium Battery - The term "lithium battery" refers to a family of batteries with different chemistries, comprising many types of cathodes and electrolytes. For the purposes of the DGR they are separated into: Lithium metal batteries. Are generally primary (non-rechargeable) batteries that have lithium metal or lithium compounds as an anode.

The Gambia un boxes for lithium batteries

UN certification: Lithium-Ion batteries , safe transport of ...

Transporting lithium-ion batteries involves risks. The packaging must therefore meet specific strict requirements. UN-number. Lithium batteries use various chemical processes to ensure maximum performance. It is therefore classified as a hazardous product and given a UN-number. With this number, the type of packaging required can be

Lithium Battery Shipping Kits
