We are solar-powered, primarily by on-site renewable sources; we have our own solar canopies. Our owners are actually just pulling permits as we speak to add a wind turbine as well.

The Marcel—named for its celebrated modernist architect Marcel Breuer—opens in New Haven in May as an all-electric hotel that generates its own power with a rooftop solar array and solar .

As a net-zero—and potentially net-positive facility—the Hotel Marcel expects to meet or exceed its energy demand through 1,000-plus solar panels installed atop its rooftop and parking canopies. On cloudy days or at nighttime, the hotel pulls power from the grid or from its on-site battery, which has a 1 MWh capacity.

At 133 rooms, the Courtyard by Marriott-Lancaster is the first Marriott-branded hotel in the United States with 100 percent of its electricity needs generated from solar power. It is also believed to be the first solar array in the country installed for the sole purpose of generating 100 percent of the electricity needs of a hotel.Which hotel has 100 percent solar power?

At 133 rooms, the Courtyard by Marriott-Lancaster at 1931 Hospitality Drive is the first Marriott-branded hotel in the United States with 100 percent of its electricity needs generated from solar power.
