Overview

Who founded Volt Netherlands?

Volt Netherlands was founded in Utrecht on 23 June 2018, with Reinier van Lanschot as its inaugural chairman. [4] The party owes its start and establishment partly to donations through crowdfunding. [5] The 2019 European Parliament election was the first election in which Volt took part.

Is Volt a governing party in the Netherlands?

As a relatively new political party in the Netherlands, Volt has no established pattern of coalition preferences. As of 2024, the only municipality where Volt is part of the governing coalition is Arnhem, where it collaborates with GroenLinks, D66, Arnhem Centraal, Partij voor de Dieren, and PvdA.

What is Volt Europe?

It is the Dutch chapter of Volt Europa, a political movement that operates on a European level. Volt Netherlands was founded in Utrecht on 23 June 2018, with Reinier van Lanschot as its inaugural chairman. [4] The party owes its start and establishment partly to donations through crowdfunding. [5].

Did Volt win a seat in the European Parliament?

Although the Dutch chapter of Volt was unable to win a seat in the European Parliament, it was represented by Volt Germany, which obtained one seat. In 2021, the party participated in the Dutch general election. On 25 October 2020, the party adopted its candidate list, with Laurens Dassen as the lead candidate. [6].

How many votes did Volt get in the 2019 European Parliament election?

The 2019 European Parliament election was the first election in which Volt took part. The party obtained 106,004 votes in the Netherlands, more than 100,000 votes too few for a seat. The party received most of its votes in university cities, such as Amsterdam, Leiden, Utrecht, and Wageningen.

Indo-Dutch Semiconductor Opportunities Report Launched!

The Indo-Dutch Semiconductor Opportunities Report highlights Dutch industry strengths and India's growing opportunities, emphasizing collaboration in design, innovation, research,

technology transfer, startup incubation, market solutions, and talent development.

Silicon Photonics (SiPh) Research By China Ends EUV Machines

Since small companies find it difficult to create these machines in large quantities, they are viewed as the weak point in China's semiconductor industry. EUV machines are necessary for producing sophisticated chips. 2019 saw the Netherlands-based ASML, which essentially has a monopoly on these machines, cease exporting the machinery to China.

The Antenna Company joins Dutch 6G FNS Program
