## Togo snt energy

## Overview

---

Does Togo have a potential for solar energy?

There has been no in-depth study to investigate potential in this sector (REEEP, 2012). Togo still has a nascent solar industry despite the potential for solar energy. To date, solar has been used for of-grid services in rural areas such as water heating, telecommunications, school systems and other small-scale applications.

What are the energy statistics for Togo?

Figures 2 and 3 show the main energy statistics. Traditional biomass is an important energy source in Togo with the biomass potential estimated at 2,600 ktoe (REEEP, 2012). Charcoal production has been increasing over the years from 330 ktoe in 2000 to 480 ktoe in 2015 (AFREC, 2015).

What percentage of the Togolese population has access to electricity?

Less than half of the Togolese population has access to electricity. The country has a relatively diversified energy mix and more than 13% of its final energy consumption comes from renewable supplies of energy, mainly hydropower. Less than half of the Togolese population has access to electricity.

Does Togo have a solar industry?

Togo still has a nascent solar industry despite the potential for solar energy. To date, solar has been used for of-grid services in rural areas such as water heating, telecommunications, school systems and other small-scale applications. The solar radiation is about 4.5 kWh/m<sup>2</sup>/day (REEEP, 2012).

Does Togo have hydrocarbon deposits?

Togo has no hydrocarbon deposits and all petroleum products are imported. In 2015, this amounted to 564 ktoe of oil products (AFREC, 2015). There is about 10 km<sup>2</sup> of peatland (WEC, 2013). There is much potential to exploit wind

energy in Togo as the wind speeds recorded are fairly good.

What percentage of Togo's electricity comes from hydro-electricity?

Just 23 per cent of Togo's electricity comes from hydro-electricity (AFREC, 2015). Togo has no hydrocarbon deposits and all petroleum products are imported. In 2015, this amounted to 564 ktoe of oil products (AFREC, 2015). There is about 10 km<sup>2</sup> of peatland (WEC, 2013).

## SNT Energy Co., Ltd. Company Profile & Data: stocks, market cap

SNT Energy Co., Ltd. was founded in 1979 and is headquartered in Changwon-si, South Korea. SNT Energy Co., Ltd. is a subsidiary of S& T Holdings Co., Ltd. Top 1-year algo backtest: +265.99% \$10,000 in October 2023 would now be \$36,599 by following this algorithm daily at market close. Use AI to boost your investing & swing trading, now!

## ENERGY PROFILE Togo

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

## SNT Energy

The air cooler is essentially used for petrochemical plants, oil refining plants, power plants and other industrial plants. The existing water-cooled heat exchangers, a simple cooling type using water, have disadvantages of

corrosion and harmful effects to the environment such as the sea water warming since they normally use the seawater.

## Togo

on the electricity sector. Togo's Energy Policy and Strategy 2012 emphasizes a diversification of the energy mix with a focus on rural electrification; it also encourages the participation of the private sector and improvements in energy data and energy efficiency. This table was compiled with material from (REEEP, 2012) and (MEF, 2014)
