Tonga greenlife solutions

Overview

What is the Tonga Coastal Resilience Project?

To address these challenges, the Tonga Coastal Resilience Project will drive a transformational shift in coastal adaptation.

How can we build a resilient Tonga by 2035?

Secure and mobilise the required finances and resources to build a Resilience Tonga by 2035. Develop and maintain strong regional and international partnerships and contribute fully to all relevant negotiations aimed at the required transformation to a resilient and sustainable future.

Why is infrastructure investment important in Tonga?

While infrastructure investments are necessary economic activities and to improve the everyday lives of the people of Tonga, these priorities are also highly vulnerable to climate change and disaster impacts and is undermining development efforts and increase communities vulnerabilities and hardships.

What can farmers do in Tonga?

There are opportunities for farmers to extend the timeframe of the current projects, to include the successful farming of dragon fruit, mung beans, turmeric, vanilla, Anthurium plants and many more. There is a concern with the slowness in broadcasting of weather forecast in Tonga.

How is the NDC implemented in Tonga?

The mechanism for implementation of Tonga's NDC is through JNAP 2 along with all other plans (at sector, island, and community level) that are fully aligned with the goal and targets of the climate change policy²⁶ and the 2010 - 2020 Tonga Energy Roadmap. Reducing greenhouse gas emissions priorities are covered in JNAP objective 4.

How does economic activity affect Tonga?

High costs of economic activity limit the competitiveness of Tonga's exports, which comprise mostly fish and agricultural products, and also result in a high dependence on imports. Remittances and to a lesser extent tourism, are the main sources of foreign exchange.
