# Tunisia us battery companies

## Overview

---

Starz Energies specializes in LFP and solid-state cell technology, Battery Pack & BMS solutions, and lithium extraction from different sources such as geothermal & oilfield brines and recycled battery materials - Pioneering innovation and sustainability within the energy sector.

Starz Energies specializes in LFP and solid-state cell technology, Battery Pack & BMS solutions, and lithium extraction from different sources such as geothermal & oilfield brines and recycled battery materials - Pioneering innovation and sustainability within the energy sector.

TEMECULA, CA — Southern California's inland region is eyed as a national leader in lithium technology, and a Tunisia-based electronics company is jumping on board with a manufacturing facility.

May 20, 2021: Bulgarian lead-acid and lithium battery maker Monbat on May 12 agreed a deal to buy 60% of the Tunisian battery firm Nour for €10.3 million (\$12.6 million). The transaction, to be financed from issuing bonds and the firm's own funds.

For over 70 years, the ASSAD Group has been the undisputed leader in the battery sector in Tunisia, and remains a major reference on the African continent. Our expertise in the manufacture and marketing of lead-acid and industrial batteries is recognized worldwide.

Now the deal has been finalised, Monbat plans to double production in Tunisia to one million starter batteries annually — boosting exports, which it said in turn should “effectively mitigate” the risks of increased costs from volatile electricity and natural gas prices in the European markets.
